TB6575/TB8575 SuitePRO™ Digital Fan Coil Thermostats

SPECIFICATION DATA

PRODUCT DESCRIPTION

The SuitePRO[™] is a family of Digital Fan Coil thermostats for residential and commercial applications such as hotels, condominiums, school classrooms, etc.

Four models are available for your application:

- TB6575A1000 2-pipe or 4-pipe with seasonal/manual/ automatic heat/cool changeover; 120/240 Vac.
- TB6575B1000 2-pipe with seasonal or manual heat/cool changeover; 120/240 Vac.
- TB6575C1000 2-pipe or 4-pipe with seasonal/manual/ automatic heat/cool changeover; 277 Vac.
- TB8575A1000 2-pipe or 4-pipe with manual and seasonal heat/cool changeover; 24Vac.

All four models are suitable for multiple applications. Changes in output wiring and external links between wiring terminals allow you to configure the thermostat for the appropriate application.

Valves and auxiliary electric heaters can be controlled using a relay or contactor controlled by the system switch.

- Option to wire a remote indoor temperature sensor.
- Freeze protect algorithm turns on heat when needed.
- Energy Saving Options:
 - Activity Sensing sets back thermostat to economy mode when there is no activity with the thermostat (4, 12, or 24 hours selectable).
 - Remote Setback Inputs receive dry contact input from a time switch, occupancy sensor, or hotel card key to set back thermostat to economy mode.
 - Auto Fan Reset eliminates the fan from being run all the time by automatically setting the fan to auto (2 or 4 hour selectable).
 - VersaSpeed[™] fan ramp algorithm automatically adjusts fan speed (low, medium, and high).
