# Sanibest Pro Grinder Handles Toughest Flushes

The powerful Sanibest Pro from SFA Saniflo allows for a modern bathroom to be installed virtually anywhere. It contains a 1-horsepower bathroom grinder system that can easily handle the accidental flushing of sanitary articles, such as feminine products, baby wipes, dental floss, condoms, etc. In addition to the main toilet connection, the unit comes with two side inlets (one on each side) that allow for various possible sanitary fixture connections, including shower, sink, bathtub, etc. It also offers ready access to the enclosed main pump components.

THE SANIBEST PRO GRINDER SHOWN BEHIND THE WALL  
WITH AN EXTENSION PIPE, SERVING A ROUND SANIFLO  
TOILET BOWL.

Operating at 3,600 RPM (revolutions per minute) for rapid elimination of heavy-duty waste, the Sanibest Pro is designed for homes, as well as public restrooms in offices, schools, factories, restaurants and any other situation where flushing sanitary items might be a concern.

Constructed from hardened stainless steel, the grinder blade rotates against a stationary, perforated base plate, so that waste is quickly and easily dispersed through the base plate's holes before being pumped into the 3/4-inch discharge line.

**Plumber-friendly:** A unique advantage of the Sanibest Pro is a removable service panel on the top of the unit, providing easy and direct access to the main pump components, without removing plumbing connections or disconnecting the unit from the toilet. The highly efficient, durable, induction motor has no gears or brushes to wear out, making it virtually maintenance-free.

# SANIFLO

“Because of the higher-horsepower motor and improved cutting power, there is no need for the service plumber to access the grinder blade inside the macerating unit,” explains Saniflo CEO Regis Saragosti. “The Sanibest Pro is still the only bathroom grinder system capable of handling virtually any sanitary item that has been accidentally flushed.”

**Extra pumping power:** Certified by CSA International for use in both the United States and Canada and IAPMO (UPC) listed, the Sanibest Pro pumps effluent higher and farther than other systems: up to 25 feet vertically when it is installed below the sewer line; or nearly 150 feet horizontally to the sewer stack or septic tank – or a lesser combination of these two distances. This extra pumping power provides home and building owners with greater flexibility in locating a new bathroom in relation to the soil stack or the septic tank.

THE SANIBEST PRO GRINDING TOILET SYSTEM IS A HEAVY-DUTY, POINT-OF-USE GRINDER PUMP FOR THE MOST DEMANDING OF TOILET APPLICATIONS.

**Quiet giant:** While the heavy-duty grinder minimizes the risk of blockages, the unit employs the latest quiet technology designed to emit less noise and vibration. “Its operating volume – like other models in our ‘Quiet Range’ lineup – is very understated,” says Regis Saragosti. “Sound and vibration improvements reduce noise levels to nearly an afterthought.”

The Sanibest Pro comes fully preassembled for installation directly behind the accompanying, high-efficiency WaterSense rear outlet toilet; or behind a finished wall using the optional 18-inch extension pipe for applications where building owners desire the pump to be hidden.
